

Precision Science®

Powders

Precision Science possesses extensive knowledge in the manufacturing, handling, and packaging of powdered products.

From ingredients and specifications to manufacturing and packaging, our goal is to make your end product the finest it can be.

We can effectively mix powders or granules with any additives necessary to meet your specifications.

- 🌿 We currently have six different mixers of various sizes to produce powders in quantities ranging from 400 kilograms up to 1200 kilograms.
- 🌿 All powders are manufactured to the highest standards of quality.
- 🌿 We use a triered sampling method to validate even distribution of ingredients within the mix.
